TATA PSS COMMISSIONS 66MW SOLAR PROJECT

New Delhi: Tata Power Solar Systems on Wednesday said it has commissioned an EPC (Engineering, Procurement, and Construction) solar project of 66MW for Vibrant Energy. The project will produce 110,029 units of energy annually. The installation will lead to a reduction of carbon emissions of up to 9 lakh tonnes, the company said in a statement. "Tata Power Solar Systems Ltd (Tata Power Solar), one of India's largest integrated solar companies and a wholly-owned subsidiary of The Tata Power Company Ltd, commissioned an EPC project of 66MW for Vibrant Energy," the statement said.Praveer Sinha, CEO & MD, Tata Power, said in the statement, "We consider the commissioning of this large EPC project for Vibrant to be a significant accomplishment since it demonstrates our best-in-class project execution capabilities."With the commissioning of this project, the company's total utility-scale solar project portfolio touches 9.7GWp. Srini Viswanathan, CEO, Vibrant Energy, said, "We are honoured to partner with Tata Power Solar for EPC of 66 MW project that has been commissioned in a record 9-month period."

Tata Power Solar Systems Limited announced the commissioning of a 66 MW EPC (Engineering, Procurement, and Construction) project for Vibrant Energy on Wednesday.

In a press release, the companies stated their commitment of leading innovation-driven renewable energy solutions in the country. Tata Power Solar also announced the formation of a number of teams to guarantee the project's smooth operation and commissioning at all levels. To assure the structural stability of the whole EHV (Extra High Voltage) system, the team built a two-level Pooling Sub-Station in the undulating terrain and earthed the hard rock ground.

The project is expected to generate up to 110,029 units of energy per year, resulting in a 9 lakh-tonne reduction in carbon emissions. Moreover, the project, which covers 191 acres and includes 1,27,268 solar modules, was finished in a record-breaking nine months, according to the statement

With the commissioning of this project, the company's total utility-scale solar project portfolio touches 9.7GWp.

June 16, 2022 9:16 IST | India Infoline News Service

Tata Power Solar Systems Limited (Tata Power Solar), one of India's largest integrated solar companies and a wholly-owned subsidiary of The Tata Power Company Limited, commissioned an EPC (Engineering, Procurement, and Construction) project of 66MW for Vibrant Energy.

According to the press release, the project will produce 110,029 units of energy annually. The installation will lead to a reduction of carbon emissions of up to 9 lakh tonnes. The project is spread over 191 acres comprising 1,27,268 solar modules and has been completed within a record nine-month period.

Tata Power Solar and Vibrant Energy share the vision of leading innovation-driven renewable energy solutions in the country. Tata Power Solar carved out a unique execution plan by deploying multiple teams to ensure smooth functioning and commissioning of the project at all levels.

The team established a two-level Pooling Sub- Station the undulating terrain, and the hard rock land was earthed to ensure the structural stability of the entire EHV (Extra High Voltage) system.

Materials were directly unloaded at the workplace to avoid delays caused due to multiple shifting and to enable immediate regularization. Along with this, insurance of modules was done before commissioning.

Commenting on the project commissioning Dr. Praveer Sinha, CEO & MD, Tata Power, said, "We consider the commissioning of this large EPC project for Vibrant Energy to be a significant accomplishment since it demonstrates our best-in-class project execution capabilities. We are sure that this project would set a new standard for industry collaboration and contribute towards India's clean energy goals."

Commenting on the partnership, Ashish Khanna, President - Renewables, Tata Power, said, "We are proud of the partnership with Vibrant Energy, it showcases the industry's trust in us and our expertise of on-time project delivery. It also reinforces Tata Power Solar's commitment to lead India's transition towards a greener future through a strategic approach and operational excellence."

The project will produce 110,029 units of energy annually. The installation will lead to a reduction of carbon emissions of up to 9 lakh tonnes. The project is spread over 191 acres comprising 1,27,268 solar modules and the project has been completed within a record nine-month period.

Commenting on the project commissioning Dr. Praveer Sinha, CEO & MD of Tata Power, said, We consider the commissioning of this large EPC project for Vibrant Energy to be a significant accomplishment since it demonstrates our best-in-class project execution capabilities.

The Tata group company said that with the commissioning of this project, the company's total utility-scale solar project portfolio touches 9.7 GWp.

Vibrant Energy's mission is to lead the transition of corporate & industrial (C&I) customers to a more sustainable, resilient, and low-cost energy future. The platform has been delivering on this mission through its extensive project portfolio of 859MW Assets Under Management across India. Vibrant Energy is an indirectly owned portfolio company of Macquarie's Green Investment Group (GIG) operating on a standalone basis.

Tata Power Solar is one of India's largest integrated solar companies.

Tata Power is one of India's largest integrated power companies and together with its subsidiaries and jointly controlled entities, has an installed/managed capacity of 13,635 MW. The company has a presence across the entire power value chain - generation (renewable, hydro and thermal power), transmission & distribution, coal & freight, logistic, trading and consumer-facing solar rooftop and electric vehicle charging businesses.

On a consolidated basis, Tata Power Company reported 28% rise in net profit to Rs 503.11 crore on 15.4% increase in net sales to Rs 11,959.96 crore in Q4 FY22 over Q4 FY21.

Shares of Tata Power Company fell 0.70% to close at Rs 218.90 on the BSE.
