Tata Power Solar revenue more than doubles in 2 years

BY PTI | UPDATED: MAY 29, 2017, 10.20 PM IST

 Post a Comment

NEW DELHI: Tata Power Solar today said its revenue has increased by more than 2.5 times in just two years to reach Rs 2,262 crore.

The company said it has ramped up the scale of business substantially by focusing on building state of art technology, engineering and strengthening on customer & employee satisfaction.

In a statement, it said the focus on efficiency and quality coupled with leveraging technology and innovation has helped the company implement several challenging projects.

The company, with a view of long-term objective, has significantly increased focus on EPC, where it had built strong competencies.

Tata Power Solar has also been the biggest rooftop player for 3 years in a row, the statement said.

Market pares gains

Market slips into red

Market extends gains

Market registers small losses

Market extended gains in mid-afternoon trade. At 14:19 IST, the barometer index, the S&P [BSE Sensex](#) was up 143.33 points or 0.46% at 31,171.54. The [Nifty 50](#) index rose 33.15 points or 0.35% at 9,628.25. The [Sensex](#) was hovering above the psychological 31,000 level after alternately moving above and below that level till early afternoon trade. It had settled above that level during the previous trading session. Both the Sensex, and the Nifty, hit record high.

Market sentiment was boosted by hopes of timely arrival of southwest monsoon rains after India Meteorological Department (IMD) in a press release dated 29 May 2017 said that conditions are becoming favorable for further advance of southwest monsoon and its setting over Kerala and parts of northeastern states around 30th to 31st May 2017.

The June-September southwest monsoon is critical for the country's agriculture because a considerable part of the country's farmland is dependent on the rains for irrigation.

The [Sensex](#) rose 186.18 points or 0.6% at the day's high of 31,214.39 in mid-afternoon trade, a record high for the index. It lost 158.31 points or 0.51% at the day's low of 30,869.90 in early trade. The [Nifty](#) rose 42.65 points or 0.44% at the day's high of 9,637.75 in mid-afternoon trade, a record high for the index. It lost 47.40 points or 0.49% at the day's low of 9,547.70 in early trade.

Among other indices, the S&P BSE Mid-Cap index was down 0.37%. The BSE Small-Cap index declined 0.89%. Both these indices underperformed the Sensex.

The breadth, indicating the overall health of the market, was weak. On the BSE, 1,658 shares declined and 927 shares rose. A total of 173 shares were unchanged.

FMCG stocks were mixed. Dabur India (up 2.72%), Hindustan Unilever (up 2.72%), Colgate-Palmolive (India) (up 2.4%) and Britannia Industries (up 0.58%) edged higher. Jyothy Laboratories (down 0.16%), Bajaj Corp (down 0.78%), Emami (down 0.13%), Procter & Gamble Hygiene and Health Care (down 0.35%) and Nestle India (down 0.31%) edged lower.

Aviation stocks declined. Jet Airways (India) (down 1.24%), InterGlobe Aviation (down 1.15%) and SpiceJet (down 0.44%) fell.

Tata Power Company (Tata Power) was up 0.19%. The company said that Tata Power Solar Systems announced that it has ramped up the scale of business substantially by focusing on building state-of-the-art technology, engineering and strengthening on customer and employee satisfaction. Tata Power Solar increased its revenue by more than two and a half times in just two years to reach Rs 2262 crore. The announcement was made during market hours today, 29 May 2017.

Overseas, European and Asian stocks edged lower amid decline in oil prices and geopolitical tensions. UK market was shut for a public holiday. China and Taiwan stock markets are closed for public holidays.

Reports suggested that North Korea today, 29 May 2017, fired off its third ballistic missile test in just over three weeks, a short-range ballistic missile that Japan said fell in the ocean within 200 miles of its coastline.

US stocks closed mixed on Friday, 26 May 2017, ahead of the Memorial Day holiday weekend.

Tata Power on Tuesday said that its renewable business registered a healthy profit, while surpassing the 2,000 MW operating capacity mark with about 500 MW under construction. In keeping with its commitment to generate 30 per cent to 40 per cent power by 2025 through renewable sources of energy, the company added 1,350 MW of renewable capacity during the year, Tata Power said in a statement. "We are happy to announce that Tata Power has registered a strong growth in renewables, which is one of our key focus areas through our recent acquisition of solar assets. The renewable energy business made a healthy contribution to PAT this year and we continue to be the largest renewable player in the country," Tata Power CEO and MD Anil Sardana said.

The second expansion within 2 years doubled the company's module capacity to 400MW, and increased its cell manufacturing capacity by 65 per cent to 300MW. The efficiency level of the cells and modules coming out of these lines are among the best in the world.

Commenting on the achievement, Mr Anil Sardana, CEO & MD, Tata Power said, "We are happy to see our team responding to Government of India's call of 'Make in India'. Considering the fact that solar EPC is extremely low margin and the pressures faced by the domestic manufacturing sector, the company has turned profitable within a short span, which is a remarkable achievement. Renewables will continue to be our key focus whether it is generation or manufacturing business. It is encouraging to see all our businesses coming together to achieve the ultimate objective of being the largest integrated player".

Tata Power's Renewable capacity crosses 2000 MW and green portfolio crosses 3000 MW mark

[Jump to the comments](#)

Tata Power, India's largest integrated power company announced that its Renewable business registered a healthy profit while surpassing the 2000 MW operating capacity mark with another about 500 MW under construction. In keeping with its commitment to generate 30% to 40% power by 2025 through renewable sources of energy, the Company added 1350 MW of renewable capacity during the year thereby making it largest green portfolio company in India.

Commenting on the Company's robust renewables business performance, Mr. Anil Sardana, CEO & Managing Director, Tata Power said, "We are happy to announce that Tata Power has registered a strong growth in Renewables which is one of our key focus areas through our recent acquisition of solar assets. The Renewable Energy Business made a healthy contribution to PAT this year and we continue to be the largest renewable player in the country. The Company aims to pursue a well charted growth strategy by demonstrating a high level of commitment towards cleaner sources of generation thus increasing the share of non-fossil fuel based generation output to 30- 40% by 2025."

Tata Power's non-fossil fuel based green generation portfolio (comprising of hydro, waste gas, solar & wind) crossed the 3000 mark and now stands at 3141 MW. During the financial year 2016-17, Tata Power's renewable arm Tata Power Renewable Energy Limited completed the acquisition of WREPL which had 1,140 MW of Renewable Power Projects. On the international front, Tata Power's South African Joint Venture Company, Cennergi, started Commercial Operations of both its wind farms totaling 230 MW; making its India's truly international power company.

Tata Power Solar more than doubles top line in 2 years

May 30 (Renewables Now) - The solar unit of Indian utility Tata Power Co Ltd (BOM:500400) has raised its revenue by more than 2.5 times in the past two years to INR 22.62 billion (USD 350m/EUR 314.4m), the parent company said on Monday.

Tata Power Solar Systems Pvt Ltd has commissioned many major projects in fiscal 2016/17, including a 100-MW plant in Andhra Pradesh for utility NTPC Ltd (BOM:532555), Tata Power said in a statement.

Anil Sardana, Tata Power's CEO and managing director, commented that the group will continue to focus on renewables, whether it is generation or manufacturing.
