Solar Energy is a full-service company offering unique solar PV products and complete energy solutions, from initial Consultation to Project concievement, Project Development and Design, Manufacturing, Installation and Maintenance. We strive hard to create products that provide solar energy at the lowest possible cost in the industry. These products are uniquely designed to install onto existing building infrastructures, without penetrations and other major modifications. The Company manufactures SPV systems and supplies the same to various Government Nodal Agencies, Private Organization AND Individuals. The Company also supplies BOS to various NGO's and organizations like, BHEL, TATA Power Solar and REIL etc.

Our commitment to total quality extends to all layers of the organization, empowering every individual – from engineering, to manufacturing, to service and support – to anticipate and meet our customers' requirements. The result of this customer-driven quality philosophy is the relentless pursuit of innovation, not for its own sake, but for the continual improvement of our products and processes, and for the satisfaction and ultimate competitive advantage of our customers.

The company enjoys a wide client base. Besides India, the esteemed customers of the company are spread Afghanistan, in India, Nepal, and other countries.[small solar panel sun and solar energy](#)
