Summary

- Tata Power Solar CEO says government has agreed figure with domestic manufacturers, adds that the 100 GW target may be hit a few years later than planned. The CEO of India's biggest solar company has told pv magazine that the Union Government's plans to install 100 GW of solar include an unofficial commitment to sourcing a quarter of the modules from domestic manufacturers.
- In a revelation that will make interesting reading to the parties to the ongoing World Trade Organization dispute between the U.S. and India over the domestic content requirement (DCR) of the Jawaharlal Nehru National Solar Mission, the head of Tata Power Solar said Indian manufacturers and
