Solar carport to help mall cut carbon footprint

POWER-UP Capacity | 300kW Area | Over 70,000sq m in Rohini

Unit generation 4,20,000 units of green energy to be produced annually, saving 130 metric tonnes of carbon dioxide from reaching the atmosphere

Meets 80% of the mall's energy needs

Will accommodate 750 cars and 750 bikes, claims Tata Power

SAVINGS | ₹ 50 lakh in electricity bills every year; ₹ 12 crore over the entire life of the plant

ROOFTOP ENERGY: Electricity generated by it will meet 80% of the mall's power needs

New Delhi: The country's first rooftop solar carport was inaugurated at a mall in Rohini on Monday. The solar plant, which has come upon the rooftop of a parking space at Unity One, can generate 300kW of electricity daily and will meet 80% of the mall's daily needs, significantly reducing its carbon footprint.

The plant, jointly developed by Tata Power Delhi discom and Tata Power Solar, will help the mall save Rs 50 lakh annually on electricity bills.

The initiative is set up as part of National Action Plan on Climate Change (NAPCC) and is in line with the climate change agenda for Delhi and National Solar Mission. While inaugurating the plant, power minister Satyendar Jain appreciated the efforts towards adopting solar power and reiterated Delhi government's commitment towards promoting rooftop solar power.

The project has been envisaged to acquire self-reliance in energy consumption and production cycle through the net-metering scheme. "Consumers and institutions can also sell the surplus power generated to the discom, and attain break-even on investment in five years," a spokesperson of Tata Power Delhi said.

The plant enables the mall to receive real value of the energy by earning on the unused solar electricity. It also cuts down the need to install a second meter or an expensive battery storage system as it is directly connected to the local power grid. "The rooftop plant will help us meet a major amount of our energy requirements through green energy," said Harshvardhan Bansal, director of Unity Group.

At the inauguration, Pra-veer Sinha, CEO & MD of Tata Power Delhi, said, "We have been an active participant for the promotion of solar energy in the country. The launch of this carport plant aims to encourage the adoption of solar power among our commercial consumers having large rooftop spaces for installation."

The discom, he added, will continue its efforts towards enhancing the use of solar power and contribute towards National Solar Mission, which aims to establish India as a global leader in solar energy.

MALL SETS UP ROOFTOP SOLAR PLANT**NOVEMBER 27, 2017****THE STATESMAN** (*print clip attached*)**Mall sets up
rooftop solar
plant**

NEW DELHI, 27 NOVEMBER

Delhi Minister for Power Satyendar Kumar Jain on Monday inaugurated India's first rooftop solar plant at Unity One mall in Rohini, Delhi. He said the plant would promote use of energy-efficient measures and encouraging rooftop solar power generation. The 300 kW plant project was jointly executed by Tata Power Delhi Distribution and Tata Power Solar.

The plant, which is claimed to be first of its kind, is expected to generate 4,20,000 units of green energy annually and meet 80 percent electricity demand of the complex. That would reduce the carbon footprint of around 438 metric tonnes (MT) every year. The plant is likely to help Unity Mall save Rs 50 lakh annually on electricity bills and Rs 12 crore during its life. The initiative is understood to be in line with climate change agenda for Delhi and the National Solar Mission as part of National Action Plan on Climate Change (NAPCC).

The grid-connected, rooftop-based PV power plants supervised by Tata Power-DDL are believed to have a life span of 25 years, wherein 1 kW of PV power plant will generate up to 1,400 units a year. Institutions can sell surplus power to discoms, and break even on their investment in five years. While inaugurating the plant, Jain appreciated Tata Power-DDL, Tata Power Solar and Unity Group's step to adopt solar power in the national capital. It reinforced Delhi government's commitment to promote rooftop solar power through favourable policy and support, he said. ^{SNS}

Tata Power Solar commissions India's first rooftop solar carport

ANI | Updated: Nov 27, 2017 16:00 IST

New Delhi [India], Nov 27 (ANI): [Tata Power Solar](#) has commissioned India's first rooftop solar car port at Unity One mall in [Rohini](#), in association with Delhi Metro Rail Corporation ([DMRC](#)), to offer provide 300KW of solar electricity.

"We feel proud to be associated with yet another milestone solar project for India. After earning the distinction of executing world's largest rooftop at a single location and India's largest carport at Cochin, we feel proud to accomplish India's first carport on a rooftop," Ashish Khanna, ED and CEO, [Tata Power Solar](#) said.

Inaugurated by Minister of Power Satyender Jain, the plant is estimated to set off 438 tons of carbon emission annually.

The company had earlier won the bid in the open tender process fielded ([DMRC](#)) for multi-level car parking.

The project has been envisaged under net-metering scheme enabling self-reliance in the energy consumption and production cycle. It enables the mall to receive real value of the energy produced by earning on the unused and excess solar electricity produced.

Jain inaugurates rooftop solar power plant at carport of mall

New Delhi, Nov 27 Delhi Power Minister Satyendar Jain today inaugurated a rooftop solar power plant at a carport in a commercial mall in Rohini area.

The 300 kW plant has been jointly executed up by Tata Power Delhi Distribution Ltd (TPDDL) and Tata Power Solar at Unity Mall.

Appreciating the initiative, Jain emphasised on the Delhi government's commitment to promote rooftop solar power plants through favourable policy and support.

The grid-connected, rooftop photo voltaic power plant, supervised by the TPDDL have a life span of 25 years, a spokesperson of the power distribution company said.

Consumers and institutions can sell the surplus power generated to the discom and attain break-even on investment in five years, he said.

"The launch of this plant aims at encouraging use of solar power among commercial consumers having large rooftop space," Praveer Sinha, CEO and MD of TPDDL said.

The power plant, which is expected to generate 4,20,000 units of green energy annually, will empower the complex's day-to-day operations meeting 80 per cent of its electricity demand. It would also reduce around 438 metric tonnes (MT) of carbon footprint annually, the spokesperson said.

The solar power plant would help the mall save Rs 50 Lakh annually on electricity bill and Rs 12 crore over the entire life span of the plant, he said.

Inaugurated by Satyender Jain, Minister of Power, the unique rooftop solar carport is estimated to set off 438 Tons of carbon emission annually.

Tata Power Solar, an integrated solar company has commissioned India's first rooftop solar carport at Unity One mall in Rohini, in association with Delhi Metro Rail Corporation (DMRC), to offer provide 300KW of solar electricity.

"We feel proud to be associated with yet another milestone solar project for India. It has been achieved by our excellent engineering skills and project management capabilities. After earning the distinction of executing world's largest rooftop at a single location

and India's largest carport at Cochin, we feel proud to accomplish India's first carport on a rooftop," Ashish Khanna, ED and CEO, Tata Power Solar said.

Inaugurated by Satyender Jain, Minister of Power, the unique rooftop solar carport is estimated to set off 438 Tons of carbon emission annually. Tata Power Solar won the bid in the open tender process fielded by Delhi Metro Rail Corporation (DMRC) for multi-level car parking.

The project has been envisaged under net-metering scheme enabling self-reliance in the energy consumption and production cycle. It enables the mall to receive real value of the energy produced by earning on the unused and excess solar electricity produced. It also cuts down the need to install a second meter or an expensive battery storage system as it is directly connected to the local power grid.

Tata Power Solar has been consistently ranked number one rooftop player for four years in running (Bridge to India). It is rated tier-1 module manufacturer by BNEF (Bloomberg New Energy Fund). It has shipped 1 GW modules to over 30 countries – the first Indian company to achieve this milestone.

Tata Power Solar Systems Limited, India's largest integrated solar company, sets another landmark by commissioning an unprecedented rooftop project in India - a solar carport on the rooftop of the sprawling 70,000 sq. mtr. Unity One mall, a Unity Group endeavor in Rohini. The unique rooftop carport is estimated to set off 438 Tons of carbon emission annually. Tata Power Solar won the bid in the open tender process fielded by Delhi Metro Rail Corporation (DMRC) for multi-level car parking. The carport was inaugurated by Mr. Satyender Jain, Minister of Power, PWD, Health & FW, Industries and Gurudwara Elections, Govt of NCT Delhi.

The project has been envisaged under net-metering scheme enabling self -reliance in the energy consumption and production cycle. It enables the mall to receive real value of the energy produced by earning on the unused and excess solar electricity produced. It also cuts down the need to install a second meter or an expensive battery storage system as it is directly connected to the local power grid.

Speaking on this occasion, Mr. Ashish Khanna, ED and CEO, Tata Power Solar said, "We feel proud to be associated with yet another milestone solar project for India. It has been achieved by our excellent engineering skills and project management capabilities. After earning the distinction of executing world's largest rooftop at a single location and India's largest carport at Cochin, we feel proud to accomplish India's first carport on a rooftop."

New Delhi, Nov 27 (PTI) Delhi Power Minister Satyendar Jain today inaugurated a rooftop solar power plant at a carport in a commercial mall in Rohini area.

The 300 kW plant has been jointly executed up by Tata Power Delhi Distribution Ltd (TPDDL) and Tata Power Solar at Unity Mall.

Appreciating the initiative, Jain emphasised on the Delhi governments commitment to promote rooftop solar power plants through favourable policy and support.

The grid-connected, rooftop photo voltaic power plant, supervised by the TPDDL have a life span of 25 years, a spokesperson of the power distribution company said.

Consumers and institutions can sell the surplus power generated to the discom and attain break-even on investment in five years, he said.

"The launch of this plant aims at encouraging use of solar power among commercial consumers having large rooftop space," Praveer Sinha, CEO and MD of TPDDL said.

The power plant, which is expected to generate 4,20,000 units of green energy annually, will empower the complexs day-to-day operations meeting 80 per cent of its electricity demand. It would also reduce around 438 metric tonnes (MT) of carbon footprint annually, the spokesperson said.

Promoting the use of energy-efficient measures and encouraging rooftop solar power generation, Delhi Power Minister Satyendar Jain on Monday inaugurated India's first rooftop solar plant at a carport commercial mall 'Unity One' at Rohini. The 300 KW plant has been jointly executed by Tata Power Delhi Distribution and Tata Power Solar.

The first of its kind plant which is expected to generate 4,20,000 units of green energy annually will empower the complex's day-to-day operations meeting 80 per cent of its electricity demand, while reducing the carbon footprint of around 438 metric tonnes (MT) every year. The plant will help 'Unity Mall' save of Rs 50 lakh annually on electricity bill and Rs 12 crore over the entire plant life. The initiative is in line with climate change agenda for Delhi and the 'National Solar Mission' and is set up as part of 'National Action Plan on Climate Change' (NAPCC).

The grid-connected, rooftop-based PV power plants supervised by Tata Power-DDL have a life span of 25 years, wherein 1KW of PV power plant will generate up to 1,400 units in a year. Consumers and institutions can also sell the surplus power generated to the Discom, and attain breakeven on investment in five years.

While inaugurating the plant, Satyendar Jain appreciated the efforts taken towards adoption of solar power in the national capital and reinforced Delhi Government's commitment to promote rooftop solar power through favourable policy and support.

Praveer Sinha, CEO and MD of Tata Power-DDL said "We have been an active participant for the promotion of solar energy in the country. The launch of this carport plant aims to encourage the adoption of solar power among our commercial consumers having large rooftop spaces for installation. We will continue our efforts towards enhancing the use of solar power and contribute towards the National Solar Mission, which aims to establish India as a global leader in solar energy."

India can easily become a world leader in solar energy. Our current solar power installed capacity is around 3 GW, which is 0.5% of the estimated potential

In a big push to encourage energy efficient measures, especially rooftop solar power generation, India's first rooftop solar plant on a carport at a commercial mall 'Unity One' in Rohini was inaugurated recently. Tata Power Delhi Distribution and Tata Power Solar have jointly executed the 300 KW plant.

This first of its kind plant which is expected to generate 4,20,000 units of green energy annually will empower the complex's day-to-day operations meeting 80 per cent of its electricity demand, while reducing the carbon footprint of around 438 metric tonnes (MT) every year. The plant will help 'Unity Mall' save of Rs 50 lakh annually on electricity bill and Rs 12 crore over the entire plant life. The initiative is in line with climate change agenda for Delhi and the 'National Solar Mission' and is set up as part of 'National Action Plan on Climate Change' (NAPCC).

The grid-connected, rooftop-based PV power plants supervised by Tata Power-DDL have a life span of 25 years, wherein 1KW of PV power plant will generate up to 1,400 units in a year. Consumers and institutions can also sell the surplus power generated to the Discom, and attain breakeven on investment in five years. This initiative though commendable still pales in front of the tremendous progress made by solar energy in many parts of the world and for that matter in many other cities of India as well. The National Solar Mission, which aims to establish India as a global leader in solar energy, has a long way to go before the objective is achieved.

India is in a unique position to extract the full advantage of alternative sources of energy such as solar power. Given the huge population and the consequent pressure on natural resources, particularly energy-India can set new milestones in the manner in which solar energy can be innovatively and thoroughly be used to cater to the burgeoning energy demand. India's current solar power installed capacity is around 3 GW, which is 0.5% of the estimated potential. Naturally there exists a massive opportunity to tap this potential and with the right policies in place backed by efficient implementation, India can easily become a world leader in solar energy. This solar endeavor could also help address acute power shortages, and make a real difference in slowing the pace of climate change.

□ Inaugurated by Hon'ble Power Minister of Delhi Sh. Satyendar Jain

□ Jointly Executed by Tata Power Delhi Distribution and Tata Power Solar

Promoting the use of energy-efficient measures and encouraging rooftop solar power generation, Sh. Satyendar Kumar Jain, Hon'ble Minister of Power, Govt. of NCT Delhi today inaugurated India's first rooftop solar plant at a carport commercial mall at Unity One, Rohini, Delhi. The 300 kW plant has been jointly executed by Tata Power Delhi Distribution and Tata Power Solar.

The first of its kind plant which is expected to generate 4,20,000 units of green energy annually will empower the complex's day to day operations meeting 80% of its electricity demand, while reducing the carbon footprint of around 438 metric tonnes (MT) every year. The plant will help Unity Mall to save of ₹50 Lakhs annually on electricity bill and ₹12 crores over the entire plant life. The initiative is in line with climate change agenda for Delhi and the National Solar Mission and is set up as part of National Action Plan on Climate Change (NAPCC).
