Tata Power subsidiary commissions 150 MW solar project in Rajasthan

TATA POWER ON Tuesday announced the commissioning of a 150 megawatt (MW) solar project in Loharki village in Rajasthan, which is expected to generate over 350 million units of electricity every year.

The project is spread over 756 acres and implemented by its 100% subsidiary Tata Power Renewable Energy (TPREL), Tata Power said.

Without disclosing financial details, it said approximately 6.56 lakh modules were used in the project and the installation is expected to reduce 3.34 lakh tonnes of carbon emission every year. For the smooth processing of the installation, 48 inverters, 720 KM of DC cable and 550 manpower have been used.

"The commissioning of the 150 MW project in Loharki, Rajasthan, has further fortified our position as one of the leading renewable energy companies in the country, with a strong presence in solar power generation. We will continue to seek the potential for sustainable growth of renewable power in India," Praveer Sinha, CEO & MD, Tata Power, said. —PTI

टाटा पावर रिन्यूएबल्स ने राजस्थान के लोहारकी में 150 मेगावाट की सोलर पीवी परियोजना शुरू की

नई दिल्ली, 24 अगस्त (एजेंसियां)। टाटा पावर की 100 प्रतिशत सहायक कंपनी टाटा पावर रिन्यूएबल एनर्जी लिमिटेड (टीपीआरईएल) ने राजस्थान के लोहारकी गांव में 150 मेगावाट की सौर ऊर्जा परियोजना शुरू करने की घोषणा की है। टीपीआरईएल ने 756 एकड़ जमीन पर फैली इस परियोजना को निर्धारित समय सीमा के भीतर पूरा किया है। संयंत्र से सालाना 350 मिलियन से अधिक इकाइयों का उत्पादन होने की उम्मीद है। इस परियोजना में लगभग 6,56,700 मॉड्यूल का उपयोग किया गया था और स्थापना से हर साल 3.34 लाख टन कार्बन उत्सर्जन में कमी आने की उम्मीद है। स्थापना के सुचारु प्रसंस्करण के लिए परियोजना में 48 इनवर्टर, 720 किमी डीसी केबल और 550 जनशक्ति का उपयोग किया गया है।

इस उपलब्धि पर बोलते हुए, टाटा पावर के सीईओ और एमडी, प्रवीर सिन्हा ने कहा, 'लोहारकी, राजस्थान में 150 मेगावाट की परियोजना के चालू होने से सौर ऊर्जा में मजबूत उपस्थिति के साथ देश में अग्रणी अक्षय ऊर्जा कंपनियों में से एक के रूप में हमारी स्थिति और बिजली उत्पादन मजबूत हुई है। हम भारत में अक्षय ऊर्जा के सतत विकास के लिए क्षमता तलाशना जारी रखेंगे।' उद्योग द्वारा सामना की जाने वाली विभिन्न कोविड-19 चुनौतियों के बावजूद, टीपीआरईएल ने टाटा पावर की ईपीसी शाखा टाटा पावर सोलर सिस्टम्स लिमिटेड के माध्यम से परियोजना की समय सीमा के भीतर परियोजना को पूरा किया है। टीपीआरईएल और टीपीसी-डी के बीच बिजली खरीद समझौते (पीपीए) पर हस्ताक्षर किए गए।

Tata Power arm commissions 150 MW solar project in Rajasthan

New Delhi, Aug 24 (PTI) Tata Power on Tuesday announced the commissioning of a 150 megawatt (MW) solar project in Loharki village in Rajasthan, which is expected to generate over 350 million units of electricity every year.

The project is spread over 756 acres and implemented by its 100 per cent subsidiary Tata Power Renewable Energy Ltd (TPREL), Tata Power said in a statement.

Without disclosing financial details, it said approximately 6.56 lakh modules were used in the project and the installation is expected to reduce 3.34 lakh tonnes of carbon emission every year. For the smooth processing of the installation, 48 inverters, 720 KM of DC cable and 550 manpower have been used.

"The commissioning of the 150 MW project in Loharki, Rajasthan, has further fortified our position as one of the leading renewable energy companies in the country, with a strong presence in solar power generation.

"We will continue to seek the potential for sustainable growth of renewable power in India," Praveer Sinha, CEO & MD, Tata Power said.

Despite various COVID-19 related challenges faced by the industry, TPREL through Tata Power's EPC arm Tata Power Solar Systems Limited has successfully completed the project within the timeline.

With this addition of 150 MW project, the total renewable installed capacity of Tata Power will be 2,947 MW, with 2015 MW of Solar

Tata Power Renewable used around 6.56 lakh modules for the solar project

Tata Power Renewable Energy - a wholly-owned subsidiary of Tata Power, commissioned a 150 megawatt (MW) solar power project in the Loharki village of Rajasthan. The plant is expected to generate more than 350 million units annually, according to a regulatory filing by Tata Power to the stock exchanges today.

The country's largest integrated power utility completed the project within the stipulated time, for which around 6.56 lakh modules were used. It is spread across 756 acres and the installation is expected to reduce 3.34 lakh tonnes of carbon emission on an annual basis. For easier and smooth processing of installation, a total of 48 inverters and 720 km of DC cable were utilised in the project.

Tata Power Renewables successfully commissions 150 MW Solar PV Project at Loharki, Rajasthan –

August 24, 2021

Tata Energy Renewables efficiently commissions 150 MW Photo voltaic PV Mission at Loharki, Rajasthan.

Tata Energy Renewable Power Ltd. (TPREL), 100% subsidiary of Tata Energy introduced commissioning of 150 MW Photo voltaic Energy challenge in Village Loharki, Rajasthan. Spreading throughout 756 Acre of land, this landmark challenge has been accomplished by TPREL throughout the stipulated timelines. The plant is anticipated to generate greater than 350 million models yearly. Roughly 656,700 modules have been used within the challenge and the set up is anticipated to scale back 3.34 lakh tons of carbon emission yearly. For the sleek processing of the set up, 48 Inverters, 720 KM of DC cable and 550 manpower have been used within the challenge.

Talking on the achievement, **Dr. Praveer Sinha, CEO & MD, Tata Energy** mentioned, “The commissioning of the 150 MW challenge in Loharki, Rajasthan has additional fortified our place as one of many main renewable vitality firm within the nation with a powerful presence in solar energy era. We are going to proceed to hunt potential of sustainable development of renewable energy in India.”

Regardless of the varied COVID-19 challenges confronted by the business, TPREL by way of Tata Energy’s EPC arm Tata Energy Photo voltaic Methods Restricted has efficiently accomplished the challenge throughout the challenge timelines as a result of its glorious challenge execution expertise & capabilities.

Tata Power Renewable, a subsidiary of Tata Power, on Tuesday said it has commissioned a 150 megawatt (MW) solar power project in Loharki, Rajasthan. According to the company press release, the project is expected to generate more than 350 million units of power annually and is spread across 756 acres of land.

It added that about 656,700 modules were used in the project and the installation is expected to reduce 3.34 lakh tonnes of carbon emission every year. "We will continue to seek potential for sustainable growth of renewable power in India," said Praveer Sinha, chief executive officer and managing director, Tata Power.

The company added that with this, the total renewables installed capacity of Tata Power will be 2,947 MW with 2,015 MW of solar and 932 MW of wind. It has another 1,064 MW of renewable projects under implementation.

Tata Power Renewable used around 6.56 lakh modules for the solar project.

Tata Power Renewable Energy - a wholly-owned subsidiary of Tata Power, commissioned a 150 megawatt (MW) solar power project in the Loharki village of Rajasthan. The plant is expected to generate more than 330 million units annually, according to a regulatory filing by Tata Power to the stock exchanges today.

The country's largest integrated power utility completed the project within the stipulated time, for which around 6.56 lakh modules were used. It is spread across 756 acres and the installation is expected to reduce 5.34 lakh tonnes of carbon emission on an annual basis. For easier and smooth processing of installation, a total of 48 inverters and 720 km of DC cable were utilised in the project.

"The commissioning of the 150 MW project in Loharki, Rajasthan has further fortified our position as one of the leading renewable energy company in the country with a strong presence in solar power generation," said Dr. Praveer Sinha, CEO & MD, Tata Power.

With the addition of the 150 MW solar power project, the total renewables installed capacity of Tata Power will be 2,947 MW - with 2,015 MW of solar and 932 MW of wind. The company has another 1,084 MW of renewable projects under implementation.
