Tatas to set up TN solar plant for ₹3,000 cr

Staff Writer

feedback@livemint.com
NEW DELHI

Tata Power Ltd on Monday said it will invest about ₹3,000 crore to build a greenfield 4GW solar cell and 4GW solar module manufacturing plant in Tamil Nadu's Tirunelveli district.

The power company and the state government on Monday signed a memorandum of understanding (MoU) in this respect, outlining their commitment to stimulate clean energy transition and employment in the state.

A Tata Power statement said it will invest the amount over 16 months, directly or indirectly creating over 2,000 employment opportunities with a majority of them women employees.

Speaking at the ceremony, Praveer Sinha, chief executive officer and managing director, Tata Power, said, "India has opportunity to spearhead the usage of clean and green energy solutions to meet its energy requirements. Tata Power Solar's new production facility being set up with the support and assistance of Tamil Nadu government, will help to meet the rising demand for clean energy solutions in the country, apart from providing huge employment opportunities."

Tata Power Solar's Tamil Nadu facility will be the company's second manufacturing unit after Bengaluru. As one of the largest solar manufacturers in India, the company operates a world-class manufacturing unit in Bangalore, with a production capacity of 635MW of modules and 500 MW of cells.

Tata Power Co. has signed a pact with the Tamil Nadu government to set up greenfield solar cells and panels manufacturing plants in Tirunelveli for Rs 3,000 crore.

The plants with 4-gigawatt capacity each will be build in 16 months, according to a company statement. This will boost the company's capacity to 4,635 megawatt of modules and 4,500 MW of cells.

Currently, the company has a manufacturing unit in Bengaluru that produces around 635 MW of modules and 500 MW of cells.

Tata Power to invest Rs 3,000 cr to build solar cell, module unit in Tamil Nadu

By [siliconindia](#) | Monday, 04 July 2022, 04:55:18 PM IST

Tata Power has signed a Memorandum of Understanding with the Tamil Nadu government to invest about Rs 3,000 crore to set up solar cell, module manufacturing unit in Tirunelveli, Tamil Nadu.

The MoU outlines the commitment made by both parties to stimulate clean energy transition and employment in the state. The investment in the plant will be made over a period of 16 months and will directly and indirectly create over 2,000 jobs, with majority of them being women employees, Tata Power said in a statement.

The MoU was signed by S Krishnan, additional chief secretary to government of Tamil Nadu, Industries Department, and Praveer Sinha, CEO & MD, Tata Power, in the presence of state chief minister M K Stalin and senior officials of the state.

"India has opportunity to spearhead the usage of clean and green energy solutions to meet its energy requirements. Tata Power Solar's new production facility, being set up with the support and assistance of Tamil Nadu government, will help to meet the rising demand for clean energy solutions in the country apart from providing huge employment opportunities," said Praveer Sinha, CEO & MD, Tata Power, said.

Here are some noteworthy cleantech announcements of the day from around the world:

NTPC Renewable Energy (NTPC REL), a wholly-owned subsidiary of NTPC, signed a memorandum of understanding (MoU) with the Rajasthan government to develop a 10 GW Ultra Mega renewable energy power park. The MOU signing marks another step toward achieving renewable capacity addition targets of NTPC. So far, NTPC REL has won 4 GW renewable energy capacity by bidding on tenders that are being implemented. NTPC REL is also developing one UMREPP (Ultra Mega Renewable Energy Power Park) of 4.75 GW capacity in the Rann of Kutch, Gujarat. It has also entered into a joint venture agreement with Demoder Valley Corporation to develop renewable energy parks and projects.

Tata Power, TN Sign MoU For 4 GW Solar Cell Manufacturing With Rs 3,000 cr Investment

By Saur News Bureau / Updated On Mon, Jul 4th, 2022

Highlights :

- Earlier, Tata Power had stressed that rather than depending on PLI schemes, the firm would make a business decision on manufacturing.
- The MoU with Tamil Nadu, if taken to its logical conclusion, will go along way in placing the state firmly on the solar map as not just a generator, but also a manufacturer.

Tata Power announced on July 4 that it has signed an MoU with the Tamil Nadu Government where the former will set up a greenfield 4GW solar cell and 4GW solar module manufacturing unit against the investment of Rs 3000 crore in Tirunelveli in the state. The MoU was signed by S Krishnan, additional chief secretary to Tamil Nadu Government, and Dr. Praveer Sinha, CEO & MD, Tata Power, in the presence of State Chief Minister M K Stalin and senior officials of the state. This will be the second manufacturing unit of the company after Bengaluru, dwarfing the much smaller Bengaluru manufacturing facility.

Tata Power has signed a memorandum of understanding (MoU) with the government of Tamil Nadu to invest around Rs 30 billion for setting up a greenfield 4 GW solar cell and 4 GW solar module manufacturing plant in Tirunelveli, Tamil Nadu.

The plant will integrate mono-passivated emitter and rear cell (PERC) bifacial technology with future n-Type technology of tunnel oxide passivated contacts (TOPCON) and will produce high wattage modules with industry-leading efficiencies. For the smooth navigation of equipment, the facility will implement autonomous mobile robots which use lasers and cameras for transporting parts. The plant will be implemented as per Industry 4.0 standards – a fully interconnected factory comprising smart manufacturing tools and technologies. The facility will be the second manufacturing unit of the company after Bangalore. The investment in the plant will be made over a period of 16 months.
