Tata Power Green Energy, a wholly-owned subsidiary of Tata Power, on Wednesday said it has commissioned a 225 megawatt (MW) hybrid power project in Rajasthan.

According to the official press release, the power generated from the project will be supplied to Tata Power Mumbai Distribution under a power purchase agreement (PPA) for 25 years to fulfill its renewable purchase obligation.

"The project will supply power to our Mumbai discom and their customers and will substantially enhance its non-carbon commitment," said Praveer Sinha, chief executive officer and managing director, Tata Power.

Kolkata, Aug. 3 -- Tata Power Green Energy Limited (TPGEL), a wholly-owned subsidiary of Tata Power, has commissioned a 225MW Hybrid power project in Rajasthan.

The power generated from the project will be supplied to Tata Power, Mumbai Distribution under a Power Purchase Agreement (PPA), valid for a period of 25 years, to fulfil its Renewable Purchase Obligation (RPO), according to a media statement here on Wednesday.

With the addition of 225 MW of hybrid power to Tata Power Mumbai's customers revised power supply portfolio will rise to 38% non-carbon power. It will be nearly double the mandatory RPO obligation. Against the yearly requirement of nearly 5,200 MUs annually the Non-carbon supply will be approximately 2,000 MUs.

## Tata Power unit commissions 225MW hybrid power project in Rajasthan

This is Tata Power's first hybrid project.

Tata Power's subsidiary, Tata Power Green Energy Limited, has commissioned a 225-megawatt (MW) hybrid power project in Rajasthan, which generated electricity will be supplied to Tata Power, Mumbai Distribution (TPC-D).

In a statement, Tata Power said that the supply to TPC-D is under 25-year a power purchase agreement to fulfil its renewable purchase obligation (RPO).

"We are excited to commission our first Hybrid project of 225MW in Rajasthan. The project will supply power to our Mumbai Discom and their customers and will substantially enhance its non-carbon commitment. It also reflects our commitment to make the use of non- carbon energy to meet the clean and green energy goals of the country," Tata Power CEO and Managing Director Praveer Sinha said.

### Tata Power Green Energy commissions hybrid project for Tata Power Mumbai customers.

Tata Power Green Energy (TPGEL), a wholly-owned subsidiary of Tata Power, has commissioned a 225 MW Hybrid power project in Rajasthan.

The power generated from the project will be supplied to Tata Power, Mumbai Distribution under a Power Purchase Agreement (PPA), valid for 25 years, to fulfill its Renewable Purchase Obligation.

This is the first hybrid project developed by Tata Power consisting of recently commissioned 225 MW of solar power at Noorsar, Rajasthan and existing wind assets of 96 MW, which is expected to generate about 700 MUs of energy per year. The plant will annually offset approx. 700 million kg of CO2.

With the addition of 225 MW of hybrid power to Tata Power's Mumbai customers, the revised power supply portfolio will rise to 38 per cent non-carbon power. It will be nearly double the mandatory RPO obligation. Against the yearly requirement of nearly 5,200 MUs annually, the non-carbon supply will be about 2,000 MUs.

Tata Power Green Energy (TPGEL), a wholly-owned subsidiary of Tata Power, has commissioned a 225 MW hybrid power project in Rajasthan.

The power generated from the project will be supplied to Tata Power, Mumbai Distribution under a power purchase agreement (PPA), valid for a period of 25 years, to fulfil its renewable purchase obligation (RPO).

The project was awarded to TPGEL and the solar part of the project has been executed by Tata Power Solar Systems, an EPC arm of Tata Power.

The project was commissioned within the stipulated timeline on 1,200 acres of land at Noorsar in Rajasthan. The project has used 5,79,488 number of modules and 103 individual wind energy generators of various ratings from the company's existing wind assets.

In spite of the various challenges like rugged terrain caused by multiple high sand dunes, harsh temperature of 50 degree celsius and unusual rains, the project was delivered as per the stipulated timeline.
