Tata Power Renewable Energy, a subsidiary of Tata Power has partnered with stainless steel maker Viraj Profile to set up a 100 MW captive solar plant.

The plant will be developed by the Tata-group company at Nandgaon at its Nasik site and the power generated will be used for captive consumption by Viraj Profile's Tarapur Plant. The plant will be developed by the Tata-group company at Nandgaon at its Nasik site and the power generated will be used for captive consumption by Viraj Profile's Tarapur Plant. With the commissioning of this plant, Viraj Profile's dependability on non-renewable power resources will be reduced by approximately 50%. The plant is expected to generate about 200 million units of energy and offset approximately 170.43 million kg of CO2 annually. Tata Power will own 74% of the generation while Viraj Profile will hold the remaining 26%. The project will get commissioned by July 2023. Ashish Khanna, CEO of Tata Power Renewable Energy said, "We are pleased to announce the establishment of our new SPV to construct a 100 MW solar power facility for Viraj Profile. We believe that this will also inspire other energyintensive sectors to join the movement for sustainable energy and shift their operations and services to clean energy sources. This project is another step in TPREL's ongoing efforts to build green and renewable energy solutions throughout India."
